CORI
HORNBÆK HOTEL

A 1935 landmark by the harbour, *where the painters came for the light.*

In 1935 the architect Ole Falkentorp drew a white, modern bathing hotel at the edge of Hornbæk harbour, a landmark of Danish functionalism. For a few bright summers painters, actors and travellers came here to swim, dine and be seen. After ninety years and many other lives, it is a hotel again, its functionalist lines restored rather than replaced, and every room filled with original art.

05 *The Hotel, a timeline*

1935 — The bathing hotel opens, drawn by Ole Falkentorp.

1940 — During the occupation the German army takes over the hotel as a lookout post.

1952 — Sold to the Polio Association, the hotel becomes a rehabilitation centre.

1980 — Rigshospitalet makes it a hospital. Hornbæk still calls it Kurbadet.

2023 — COPI buys the landmark from the Danish state and begins the rebuild with investors.

2026 — Sagitta Family Office joins as majority owner, and CORI opens its doors on 25 September.

06 *Krøyer and the light*

In May 1873 a young Peder Severin Krøyer came to Hornbæk with Viggo Johansen and Kristian Zahrtmann, drawn by the light thrown back from the white sand. In 1875 he set up his easel on the beach just below where CORI stands today and painted Morgen ved Hornbæk. Fiskerne kommer i land, which hangs today in the Hirschsprung Collection in Copenhagen. Years later the painters made Skagen famous. Hornbæk came first.
